The Interpretation of Nature and the Psyche By Carl Gustav Jung, Wolfgang Ernst Pauli

Carl Gustav Jung (1875-1961) and Wolfgang Ernst Pauli (1900 – 1958) were two of the greatest thinkers of modern times. Jung is the founder of Analytical Psychology and is one of the best known researchers in the field of Dream Interpretation and Symbolization. Pauli was one of the pioneers of Quantum Physics. In 1945, Pauli received the Nobel Prize in Physics after being nominated by Albert Einstein for his “decisive contribution through his discovery of a new law of Nature, the exclusion principle” involving spin theory underpinning the structure of matter and the whole of chemistry. Together they collaborated on this book that was first published in 1952 in German as *Naturerklärung und Psyche*. C. G. Jung: *Synchronizität als ein Prinzip akausaler Zusammenhänge*. W. Pauli: *Der Einfluss archetypischer Vorstellungen auf die Bildung naturwissenschaftlicher Theorien bei Kepler*. However, our reviewer, himself an eminent professor of mathematics, concludes, “After thoroughly studying their writings for many months now, I have come to see clearly that they are both utterly mad”.

Editorial Review

About the Author

Carl Gustav Jung (born 26 July 1875 – died 6 June 1961) was a Swiss psychiatrist and the founder of analytical psychology. Jung is considered the first modern psychiatrist to view the human psyche as "by nature religious" and make it the focus of exploration. Jung is one of the best known researchers in the field of dream analysis and symbolization. While he was a fully involved and practicing clinician, much of his life's work was spent exploring tangential areas, including Eastern and Western philosophy, alchemy, astrology, and sociology, as well as literature and the arts. Wolfgang Ernst Pauli (born 25 April 1900 – died 15 December 1958) was an Austrian theoretical physicist and one of the pioneers of quantum physics. In 1945, after being nominated by Albert Einstein, he received the Nobel Prize in Physics for his "decisive contribution through his discovery of a new law of Nature, the exclusion principle or Pauli principle," involving spin theory, underpinning the structure of matter and the whole of chemistry.

Users Review

From reader reviews:

Holley Shipman:

What do you in relation to book? It is not important with you? Or just adding material when you require something to explain what you problem? How about your time? Or are you busy person? If you don't have spare time to do others business, it is make one feel bored faster. And you have extra time? What did you do? Every individual has many questions above. They need to answer that question because just their can do in which. It said that about publication. Book is familiar on every person. Yes, it is correct. Because start from on pre-school until university need this particular The Interpretation of Nature and the Psyche to read.

Peter Wright:

Information is provisions for people to get better life, information presently can get by anyone in everywhere. The information can be a information or any news even a problem. What people must be consider if those information which is inside the former life are challenging be find than now's taking seriously which one works to believe or which one typically the resource are convinced. If you find the unstable resource then you have it as your main information there will be huge disadvantage for you. All those possibilities will not happen with you if you take The Interpretation of Nature and the Psyche as the daily resource information.

Kelly Livingston:

This book untitled The Interpretation of Nature and the Psyche to be one of several books that will best seller in this year, honestly, that is because when you read this e-book you can get a lot of benefit on it.
