**Linux Cookbook: Practical Advice for Linux System Administrators** By Carla Schroder

This unique and valuable collection of tips, tools, and scripts provides clear, concise, hands-on solutions that can be applied to the challenges facing anyone running a network of Linux servers from small networks to large data centers in the practical and popular problem-solution-discussion O'Reilly cookbook format. The *Linux Cookbook* covers everything you'd expect: backups, new users, and the like. But it also covers the non-obvious information that is often ignored in other books the time-sinks and headaches that are a real part of an administrator's job, such as: dealing with odd kinds of devices that Linux historically hasn't supported well, building multi-boot systems, and handling things like video and audio. The knowledge needed to install, deploy, and maintain Linux is not easily found, and no Linux distribution gets it just right. Scattered information can be found in a pile of man pages, texinfo files, and source code comments, but the best source of information is the experts themselves who built up a working knowledge of managing Linux systems. This cookbook's proven techniques distill years of hard-won experience into practical cut-and-paste solutions to everyday Linux dilemmas. Use just one recipe from this varied collection of real-world solutions, and the hours of tedious trial-and-error saved will more than pay for the cost of the book. But those who prefer to learn hands-on will find that this cookbook not only solves immediate problems quickly, it also cuts right to the chase pointing out potential pitfalls and illustrating tested practices that can be applied to a myriad of other situations. Whether you're responsible for a small Linux system, a huge corporate system, or a mixed Linux/Windows/macOS network, you'll find valuable, to-the-point, practical recipes for dealing with Linux systems everyday. The *Linux Cookbook* is more than a time-saver; it's a sanity saver.

### **Editorial Review**

#### About the Author

Carla Schroder is a self-taught Linux and Windows sysadmin who laid hands on her first computer around her 37th birthday. Her first PC was a Macintosh LC II. Next came an IBM clone--a 386SX running MS-DOS 5 and Windows 3.1 with a 14-inch color display--which was adequate for many pleasant hours of Doom play. Then around 1997 she discovered Red Hat 5.0 and had a whole new world to explore.

Somewhere along the way she found herself doing freelance consulting for small businesses and home users, supporting both Linux and Windows users and integrating Linux and Windows on the LAN, primarily Linux servers and Windows clients. She is the author of the Linux Cookbook for O'Reilly, and writes Linux how-tos for several computer publications.

Carla is living proof that you're never too old to try something new; computers are a heck of a lot of fun; and anyone can learn to do anything. Visit [tuxcomputing.com](http://tuxcomputing.com) for more Carla stuff.

### **Users Review**

#### **From reader reviews:**

##### **Judy Young:**
