## Cognitive Radio Networks: Medium Access Control for Coexistence of Wireless Systems By Kaigui Bian, Jung-Min Park, Bo Gao

This book gives a comprehensive overview of the medium access control (MAC) principles in cognitive radio networks, with a specific focus on how such MAC principles enable different wireless systems to coexist in the same spectrum band and carry out spectrum sharing. From algorithm design to the latest developments in the standards and spectrum policy, readers will benefit from leading-edge knowledge of how cognitive radio systems coexist and share spectrum resources. Coverage includes cognitive radio rendezvous, spectrum sharing, channel allocation, coexistence in TV white space, and coexistence of heterogeneous wireless systems.

### **Editorial Review**

From the Back Cover

This book gives a comprehensive overview of the medium access control (MAC) principles in cognitive radio networks, with a specific focus on how such MAC principles enable different wireless systems to coexist in the same spectrum band and carry out spectrum sharing. From algorithm design to the latest developments in the standards and spectrum policy, readers will benefit from leading-edge knowledge of how cognitive radio systems coexist and share spectrum resources. Coverage includes cognitive radio rendezvous, spectrum sharing, channel allocation, coexistence in TV white space, and coexistence of heterogeneous wireless systems.

- Provides a comprehensive reference on medium access control (MAC)-related problems in the design of cognitive radio systems and networks;
- Includes detailed analysis of various coexistence problems related to medium access control in cognitive radio networks;
- Reveals novel techniques for addressing the challenges of coexistence protocol design at a higher level of abstraction;
- Discusses technical challenges of MAC layer protocol design for heterogeneous wireless systems as well as potential solutions.

### **About the Author**

Kaigui Bian received his B.S. degree in Computer Science from Peking University in 2001, and received his Ph.D. degree in Computer engineering from Virginia Tech in 2011. He is currently an Assistant Professor in the Institute of Network Computing and Information Systems, School of EECS at Peking University. His research interests include cognitive radio networks, mobile computing, network security and privacy. He was a visiting scholar at Microsoft Research Asia in 2013. He is a member of the IEEE, the ACM, and the CCF.

Jung-Min “Jerry” Park received a Ph.D. degree in electrical and computer engineering from Purdue University in 2003. He is currently an associate professor in the Department of Electrical and Computer Engineering at Virginia Tech, and the site director of a National Science Foundation (NSF) Industry-University Cooperative Research Center (I-UCRC) called Broadband Wireless Access & Applications Center (BWAC). As the site director of BWAC at Virginia Tech, Park is leading several sponsored research projects on wireless networks and network security. He is widely recognized for his pioneering work on enforcement and security problems in cognitive radio networks. His research interests include cognitive radio networks, spectrum sharing technologies, network security and privacy, and applied cryptography. Current or recent research sponsors include the NSF, National Institutes of Health (NIH), Defense Advanced Research Projects Agency (DARPA), Office of Naval Research (ONR), SANS (SysAdmin, Audit, Network Security) Institute, Motorola Solutions, Samsung Electronics, and SCA Techniques. More details on his research interests can be found at <http://www.arias.ece.vt.edu> and <http://www.bwac.wireless.vt.edu/index.html>. He is a recipient of a 2014 Virginia Tech College of Engineering Faculty Fellow Award, a 2008 NSF Faculty Early Career Development (CAREER) Award, a 2008 Hoeber Excellence in Research Award, a 1998 AT&T Leadership Award, and a coauthor of a paper that won the Best Paper Award at the 2014 IEEE Symposium on New Frontiers in Dynamic Spectrum

Access Networks (DySPAN). He is a senior member of the IEEE and the ACM, and a member of the Korean-American Scientists and Engineers Association (KSEA).

Bo Gao is currently a Ph.D. student in the Department of Electrical and Computer Engineering at Virginia Tech. He received his Bachelor's degree in Electrical Engineering from Beijing Jiaotong University, China in 2006, and his Master's degree in Electrical Engineering from Shanghai Jiaotong University, China in 2009. His research interests include wireless networking, dynamic spectrum access, and network coexistence.

## **Users Review**

### **From reader reviews:**

#### **Mary James:**

The guide with title Cognitive Radio Networks: Medium Access Control for Coexistence of Wireless Systems includes a lot of information that you can learn it. You can get a lot of help after read this book. This particular book exist new know-how the information that exist in this publication represented the condition of the world right now. That is important to you to learn how the improvement of the world. This kind of book will bring you in new era of the globalization. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

#### **Paula Adame:**

The book untitled Cognitive Radio Networks: Medium Access Control for Coexistence of Wireless Systems contain a lot of information on it. The writer explains the woman idea with easy means. The language is very easy to understand all the people, so do not worry, you can easy to read this. The book was written by famous author. The author will take you in the new time of literary works. It is possible to read this book because you can please read on your smart phone, or gadget, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can start their official web-site along with order it. Have a nice study.

#### **Irving Carlin:**

That book can make you to feel relax. This specific book Cognitive Radio Networks: Medium Access Control for Coexistence of Wireless Systems was multi-colored and of course has pictures around. As we know that book Cognitive Radio Networks: Medium Access Control for Coexistence of Wireless Systems has many kinds or genre. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and feel that you are the character on there. Therefore not at all of book usually are make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading that will.

**Thomas Paine:**

What is your hobby? Have you heard this question when you got students? We believe that that issue was given by teacher for their students. Many kinds of hobby, Every person has different hobby. So you know that little person just like reading or as reading through become their hobby. You need to understand that reading is very important as well as book as to be the issue. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You discover good news or update about something by book. Different categories of books that can you take to be your object. One of them is Cognitive Radio Networks: Medium Access Control for Coexistence of Wireless Systems.
