Bioceramics and their Clinical Applications (Woodhead Publishing Series in Biomaterials) From Woodhead Publishing

Bioceramics have been used very successfully within the human body for many years. They are commonly used in orthopaedic surgery and dentistry but they are potentially suitable for a wide range of important applications within the medical device industry. This important book reviews the range of bioceramics, their properties and range of clinical uses.

Chapters in the first section of the book discuss issues of significance to a range of bioceramics such as their structure, mechanical properties and biological interactions. The second part reviews the fabrication, microstructure and properties of specific bioceramics and glasses, concentrating on the most promising materials. These include alumina and zirconia ceramics, bioactive glasses and bioactive glass-ceramics, calcium sulphate, tricalcium phosphate-based ceramics, hydroxyapatite, tricalcium phosphate/hydroxyapatite biphasic ceramics, si-substrated hydroxyapatite, calcium phosphate cement, calcium phosphate coating, titania-based materials, ceramic-polymer composites, dental ceramics and dental glass-ceramics. The final group of chapters reviews the clinical applications of bioceramics in joint replacement, bone grafts, tissue engineering and dentistry.

Bioceramics and their clinical applications is written by leading academics from around the world and it provides an authoritative review of this highly active area of research. This book is a useful resource for biomaterials scientists and engineers, as well as for clinicians and the academic community.

- Provides an authoritative review of this highly active area of research
- Discusses issues of significance of a range of bioceramics such as their structure, mechanical properties and biological interactions
- Reviews the clinical applications of bioceramics in joint replacement, bone grafts, tissue engineering and dentistry

Editorial Review

About the Author

Tadashi Kokubo is a Professor at the College of Life and Health Sciences, Chubu University, Japan. He is a member of many academic institutions in the area of ceramics and biomaterials, including the Japanese Society for Biomaterials, the Ceramic Society of Japan, the International Society for Ceramics in Medicine, and the World Academy of Ceramics.

Users Review

From reader reviews:

Lauren Barnett:

Reading a guide tends to be new life style on this era globalization. With examining you can get a lot of information that will give you benefit in your life. Along with book everyone in this world could share their idea. Publications can also inspire a lot of people. Lots of author can inspire their very own reader with their story or perhaps their experience. Not only the storyline that share in the ebooks. But also they write about the ability about something that you need illustration. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors on earth always try to improve their expertise in writing, they also doing some research before they write for their book. One of them is this *Bioceramics and their Clinical Applications (Woodhead Publishing Series in Biomaterials)*.

Dawn Spigner:

The book *Bioceramics and their Clinical Applications (Woodhead Publishing Series in Biomaterials)* has a lot of information on it. So when you make sure to read this book you can get a lot of advantage. The book was published by the very famous author. The writer makes some research just before write this book. This particular book very easy to read you will get the point easily after reading this article book.

Annie Resnick:

That e-book can make you to feel relax. This particular book *Bioceramics and their Clinical Applications (Woodhead Publishing Series in Biomaterials)* was colorful and of course has pictures on the website. As we know that book *Bioceramics and their Clinical Applications (Woodhead Publishing Series in Biomaterials)* has many kinds or category. Start from kids until young adults. For example *Naruto* or *Private eye Conan* you can read and feel that you are the character on there. So , not at all of book tend to be make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book for you and try to like reading that will.

Barbara Kyle:

E-book is one of source of know-how. We can add our understanding from it. Not only for students but native or citizen want book to know the update information of year for you to year. As we know those textbooks have many advantages. Beside all of us add our knowledge, can also bring us to around the world. With the book Bioceramics and their Clinical Applications (Woodhead Publishing Series in Biomaterials) we can acquire more advantage. Don't you to definitely be creative people? To get creative person must love to read a book. Just choose the best book that suited with your aim. Don't always be doubt to change your life at this book Bioceramics and their Clinical Applications (Woodhead Publishing Series in Biomaterials). You can more attractive than now.
