On the Art of Building in Ten Books (MIT Press) By Leon Battista Alberti

De Re Aedificatoria, by Leon Battista Alberti (1404-1472), was the first modern treatise on the theory and practice of architecture. Its importance for the subsequent history of architecture is incalculable, yet this is the first English translation based on the original, exceptionally eloquent Latin text on which Alberti's reputation as a theorist is founded.

Editorial Review

Review

A new and valuable resource which immediately relegates to the category of a curiosity Rykwert's earlier republication of James Leoni's translation...Now all those involved with architecture...can listen to Alberti and find that he has much to say that will interest them.

(John Onians *Building Design*)

Brilliantly translated...Rykwert and his team have restored the pleasures of Alberti's writing for English readers...This undoubtedly deserves to become the standard English translation.

(Anthony Hughes *Times Literary Supplement*)

This English edition surpasses the earlier one in a number of significant ways...It will no doubt soon find a place on all architectural reading lists, and deservedly so.

(Paul Davies *Art History*)

Language Notes

Text: English, Italian (translation)
