Biotechnology for Beginners By Reinhard Renneberg

Biotechnology is the applied science of using living organisms and their by-products for commercial development. It has grown and evolved to such an extent over the past few years that increasing numbers of professionals work in areas directly impacted by it. For the first time, this book offers an exciting and colorful overview of biotechnology for professionals and students in a wide array of the life sciences including: Genetics, Immunology, Biochemistry, Agronomy, Food Science, and Animal Science. This book also appeals to the lay reader without a scientific background who is interested in an entertaining and informative introduction to the key aspects of biotechnology.

Authors Renneberg and Demain discuss the opportunities and risks of individual technologies and provide historical data in easy-to-reference boxes, highlighting key topics. **Biotechnology for Beginners** covers all major aspects of the field, from food biotechnology to enzymes, genetic engineering, viruses, antibodies, and vaccines, to environmental biotechnology, transgenic animals, analytical biotechnology, and the human genome. This stimulating book is the most user-friendly source for a comprehensive overview of this complex field.

- Accessible to the lay reader without scientific background knowledge
- Coverage includes all facets of biotechnology applications
- Includes articles from the hottest Scientists: Alan Guttmacher, Carl Djerassi, Frances S. Ligler, Jared Diamond, Susan Greenfield, and more
- Each chapter concludes with a summary, annotated references, links to useful Web sites, and appealing review questions
- More than 600 color figures and over 100 illustrations
- Written in an enthusiastic and engaging style unlike other existing theoretical and dry-style biotechnology books

Editorial Review

Review

"This great book is highly contagious, if you open it, you want to read more and more..."

--Jim Larrick, US-Biotech entrepreneur and founder of Absalus

About the Author

Reinhard Renneberg received his PhD at Central Institute of Molecular Biology, Berlin, German Democratic Republic in 1979. Since 1995 Professor Renneberg has been heading the Biosensor group at the Department of Chemistry of the Hong Kong University of Science and Technology. He is an expert in biotests, biosensors and signal amplification technologies. Dr. Renneberg is also the inventor of Cardiodetect, a rapid fatty acid-binding protein (FABP) immunotest which allows diagnosis or exclusion of acute myocardial infarction within half an hour after the onset of symptom and of InfectCheck, a barcode-style lateral flow assay for semi-quantitative detection of C-reactive protein (CRP) in distinguishing between bacterial and viral infections.

Dr. Renneberg is the author of several books on biotechnology, including the award-winning textbook *Biotechnology for Beginners* which the university includes in many of its training packages. He advises a wide range of biotechnology companies as expert content provider, pedagogical expert and top-level academic relay for biotechnology education.

Users Review

From reader reviews:

Frank Johnson:

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their free time with their family, or their particular friends. Usually they accomplishing activity like watching television, going to beach, or picnic inside park. They actually doing same thing every week. Do you feel it? Will you something different to fill your free time/ holiday? Can be reading a book could be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to try look for book, may be the e-book untitled *Biotechnology for Beginners* can be great book to read. May be it might be best activity to you.

David Smith:

People live in this new day of lifestyle always attempt to and must have the free time or they will get wide range of stress from both day to day life and work. So , once we ask do people have spare time, we will say absolutely without a doubt. People is human not just a robot. Then we request again, what kind of activity are there when the spare time coming to anyone of course your answer can unlimited right. Then ever try this one, reading textbooks. It can be your alternative inside spending your spare time, often the book you have read is actually *Biotechnology for Beginners*.

Heather Vazquez:

That reserve can make you to feel relax. That book Biotechnology for Beginners was multi-colored and of course has pictures on there. As we know that book Biotechnology for Beginners has many kinds or variety. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and think that you are the character on there. Therefore , not at all of book are usually make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book for yourself and try to like reading which.

Hector Medlin:

What is your hobby? Have you heard this question when you got students? We believe that that query was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person like reading or as examining become their hobby. You need to understand that reading is very important along with book as to be the issue. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You see good news or update in relation to something by book. Numerous books that can you take to be your object. One of them are these claims Biotechnology for Beginners.
