Capitalism 4.0: The Birth of a New Economy in the Aftermath of Crisis By Anatole Kaletsky

In this controversial book, Anatole Kaletsky puts the upheavals of 2007-2009 in historical and ideological perspective. He shows how the forces that precipitated the financial meltdown are now creating a new and stronger version of the global capitalist system-- one that will continue to be led and shaped by the U.S. if its businesses and politicians play their cards well. This is *Capitalism 4.0*, and it will change politics, finance, international relations, and economic thinking in the coming decades.

Editorial Review

Review

'Anatole Kaletsky is a brilliant economist and a gifted writer, a combination as valuable as it is unusual. Capitalism 4.0 will add greatly to our understanding of the future of global finance' George Soros 'Anatole Kaletsky is one of the handful of heavyweight UK commentators who set the tone of public discourse on economic policy. His book goes well beyond typical comment to give an insightful analysis of the recent financial crash in a broad historical context' Vince Cable 'Idiosyncratic, entertaining and contrarian' Sunday Times 'A hugely ambitious and controversial account of the credit crunch which brilliantly traces the hotchpotch of economic theories that underpins it, and convincingly explains how it came to go so catastrophically wrong ... Kalestsky offers a genuinely new take on the credit crunch' Literary Review
