**Field Experience Guide for Elementary and Middle School Mathematics: Teaching Developmentally** By John A. Van de Walle, Jennifer M. Bay-Williams

The *Field Experience Guide*, a supplement to *Elementary and Middle School Mathematics, 8th Edition*, is for observation, practicum, and student teaching experiences at the elementary and middle school levels. The guidebook contains three parts: Part I provides tasks for preservice teachers to do in the field; Part II provides three types of activities: Expanded Lessons, Mathematics Activities, and Balanced Assessment Tasks. Part III of this guide contains a full set of reproducible Blackline Masters referenced in the 8th edition of *Elementary and Middle School Mathematics* as well as additional Blackline Masters for use with the Expanded Lessons in Part II. A convenient *Field Experience Guide Connections* section at the end of each chapter in the 8th Edition will help you better integrate the information from the text with the *Field Experience Guide* to support with your work in schools.

### **Editorial Review**

From the Back Cover

The Field Experience Guide is for field experiences, practicums, and/or student teaching experiences at the elementary and middle school levels. This guide contains three parts: Part I, Menu of Field Experiences, provides tasks for preservice teachers to use in the classroom; Part II, Resources for Teaching, provides three types of activities: Expanded Lessons, Mathematics Activities, and Balanced Assessment Tasks; Part III, Blackline Masters, features reproducibles, along with suggestions for the use and construction of many of these materials.

Every chapter in Part I includes field-based tasks that align to the National Council for Accreditation of Teacher Education (NCATE) standards; National Council of Teachers of Mathematics (NCTM) standards; and the textbook, *Elementary and Middle School Mathematics: Teaching Developmentally*, 8/e by John A. Van de Walle, Karen S. Karp, and Jennifer M. Bay-Williams. New field experiences have also been added to include a focus on Common Core State Standards content. Revised rubrics in each chapter help you and your professor assess your progress on the topic of that particular chapter.

Part II features updated Expanded Lessons. Each lesson now opens with a Grade Level Guide based on Common Core State Standards, as well as NCTM Curriculum Focal Points. Strategies for English language learners (ELLs) and Students with Disabilities have also been added to each lesson. In addition to these 24 effective lessons, Part II has a collection of Mathematics Activities that can be developed into engaging lessons. This edition includes three new problem-based tasks for a more comprehensive coverage of content. Finally, three balanced assessment tasks are provided, which can be used as lessons or assessment of student learning. The lessons and activities in Part II can be used to complete the field experiences in Part I.

Part III contains reproducible Blackline Masters referenced in *Elementary and Middle School Mathematics: Teaching Developmentally*, 8/e and Expanded Lessons in Part II.

**Enjoy this collection of experiences as they support you in your journey toward effective mathematics teaching.**

### **Users Review**

**From reader reviews:**

**James Stover:**

The particular book Field Experience Guide for Elementary and Middle School Mathematics: Teaching Developmentally will bring one to the new experience of reading a book. The author style to clarify the idea is very unique. Should you try to find new book to read, this book very appropriate to you. The book Field Experience Guide for Elementary and Middle School Mathematics: Teaching Developmentally is much recommended to you to study. You can also get the e-book in the official web site, so you can more easily to read the book.

**Robert Warden:**
