Molecular Cell Biology By Harvey F. Lodish

This is an authoritative and comprehensive vision of molecular cell biology. Advances in our knowledge of how cells work have driven the discipline to the point where we understand the cell at new levels of complexity such as larger signalling complexes in cells, and cells interacting with other cells. To present this new view of molecular cell biology and the accompanying advances in experimental technology, the fifth edition shows exciting developments in cell birth, lineage and death expanded coverage of signalling systems within the whole cell/organism and expanded coverage of metabolism and movement of lipids. In addition, new pedagogy includes research questions by looking at real experimental data in "analysing the data" problems and "updated perspectives for the future" at the end of each chapter, which explore potential applications of future discoveries and unanswered questions that lie ahead for researchers. The media package includes a companion website with animations, videos and classic experiments covering groundbreaking molecular cell biology experiments to enhance student learning. For instructors there are PowerPoint images from the text solutions and a test bank. Other supplements include an instructor's CD-ROM containing all text images, a conversion guide from the 4th edition test bank animations and videos, and overhead transparencies. And for students there is the "Working with Molecular Cell Biology, Fifth Edition: A Study Companion and Solutions Manual".

Molecular Cell Biology By Harvey F. Lodish Bibliography

- Sales Rank: #4721810 in Books
- Brand: Brand: Macmillan Higher Education
- Published on: 2003-12
- Original language: English
- Number of items: 1
- Dimensions: 5.00" h x 5.00" w x .25" l,
- Binding: CD-ROM

Editorial Review

About the Author

HARVEY LODISH is Professor of Biology at the Massachusetts Institute of Technology and Member of the Whitehead Institute for Biomedical Research.

Users Review

From reader reviews:

Andrew Wilson:

What do you concentrate on book? It is just for students because they are still students or this for all people in the world, what best subject for that? Simply you can be answered for that issue above. Every person has distinct personality and hobby for every single other. Don't to be pressured someone or something that they don't need do that. You must know how great in addition to important the book Molecular Cell Biology. All type of book can you see on many resources. You can look for the internet resources or other social media.

Jess Bolan:

Information is provisions for individuals to get better life, information these days can get by anyone from everywhere. The information can be a know-how or any news even an issue. What people must be consider whenever those information which is inside the former life are difficult to be find than now is taking seriously which one is suitable to believe or which one the actual resource are convinced. If you receive the unstable resource then you have it as your main information you will have huge disadvantage for you. All of those possibilities will not happen in you if you take Molecular Cell Biology as your daily resource information.

Mary Summers:

Your reading sixth sense will not betray an individual, why because this Molecular Cell Biology reserve written by well-known writer who really knows well how to make book which can be understand by anyone who read the book. Written throughout good manner for you, dripping every ideas and producing skill only for eliminate your current hunger then you still skepticism Molecular Cell Biology as good book not just by the cover but also through the content. This is one guide that can break don't assess book by its protect, so do you still needing an additional sixth sense to pick this particular!? Oh come on your reading sixth sense already told you so why you have to listening to a different sixth sense.

John Hill:

That guide can make you to feel relax. This kind of book Molecular Cell Biology was multi-colored and of course has pictures on there. As we know that book Molecular Cell Biology has many kinds or variety. Start

from kids until youngsters. For example Naruto or Private eye Conan you can read and believe that you are the character on there. Therefore not at all of book are usually make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading this.
