Social Transformations in Scandinavian Cities: Nordic Perspectives on Urban Marginalisation and Social Sustainability From Nordic Academic Press

The Social Transformations of Scandinavian Cities highlights the changing face of social sustainability and social disintegration in Scandinavian cities against the backdrop of ongoing global societal transformations. It contributes to the literature on urban development in advanced societies by bringing in theoretical and empirical analyses of how migration, inequality, residential segregation, and changes in national and local policy intersects and unfolds in urban landscapes in Denmark, Norway and Sweden. In particular this volume contributes with insights to how these processes play out in a Scandinavian welfare state-context. In *The Social Transformations of Scandinavian Cities* we learn in which ways and how progress is being made today.
