Cardboard in Architecture: Volume 7 Research in Architectural Engineering Series

By M. Eekhout, F. Verheijen, R. Visser

Cardboard in Architecture: Volume 7 Research in Architectural Engineering Series By M. Eekhout, F. Verheijen, R. Visser

The Department of Building Technology at the Faculty of Architecture at TU Delft is studying and developing cardboard as a potential building material on a broad, systematic and where possible comprehensive basis. The guiding research question is: 'How can cardboard be used in both architectural and structural terms as a fully fledged building material, making use of the material-specific properties?' An exploratory phase from 2003 to 2005 - including an outdoor pilot structure (multi-shed), a pilot pavilion accommodating, an exhibition, workshops on resistance to fire and to damp, a first patent (KCPK), the design of an interior wall (Besin) and the publication of this book - was concluded by an international symposium attended by both the paper industry and the building industry. This publication comprises the report on that symposium.

IOS Press is an international science, technical and medical publisher of high-quality books for academics, scientists, and professionals in all fields.

Some of the areas we publish in:

-Biomedicine

- Binding: Paperback
- 176 pages

Editorial Review

Users Review

From reader reviews:

Dawn Williams:

The book Cardboard in Architecture: Volume 7 Research in Architectural Engineering Series give you a sense of feeling enjoy for your spare time. You should use to make your capable far more increase. Book can for being your best friend when you getting pressure or having big problem with the subject. If you can make reading through a book Cardboard in Architecture: Volume 7 Research in Architectural Engineering Series to become your habit, you can get much more advantages, like add your own capable, increase your knowledge about a number of or all subjects. You may know everything if you like open up and read a e-book Cardboard in Architecture: Volume 7 Research in Architectural Engineering Series. Kinds of book are several. It means that, science guide or encyclopedia or others. So , how do you think about this book?

Scott Seward:

Book is to be different for each and every grade. Book for children until adult are different content. We all know that that book is very important usually. The book Cardboard in Architecture: Volume 7 Research in Architectural Engineering Series had been making you to know about other understanding and of course you can take more information. It is very advantages for you. The publication Cardboard in Architecture: Volume 7 Research in Architectural Engineering Series is not only giving you more new information but also to be your friend when you sense bored. You can spend your personal spend time to read your book. Try to make relationship with all the book Cardboard in Architecture: Volume 7 Research in Architectural Engineering Series. You never really feel lose out for everything if you read some books.

Matthew Hansen:

Do you considered one of people who can't read satisfying if the sentence chained from the straightway, hold on guys this specific aren't like that. This Cardboard in Architecture: Volume 7 Research in Architectural Engineering Series book is readable by you who hate the perfect word style. You will find the information here are arrange for enjoyable studying experience without leaving even decrease the knowledge that want to provide to you. The writer connected with Cardboard in Architecture: Volume 7 Research in Architectural Engineering Series content conveys objective easily to understand by a lot of people. The printed and e-book are not different in the content but it just different as it. So , do you continue to thinking Cardboard in Architecture: Volume 7 Research in Architectural Engineering Series is not loveable to be your top list reading book?

Kayla France:

The actual book Cardboard in Architecture: Volume 7 Research in Architectural Engineering Series will bring you to definitely the new experience of reading any book. The author style to clarify the idea is very unique. When you try to find new book to see, this book very suitable to you. The book Cardboard in Architecture: Volume 7 Research in Architectural Engineering Series is much recommended to you to study. You can also get the e-book from official web site, so you can easier to read the book.
