General Trauma Care and Related Aspects: Trauma Surgery II (European Manual of Medicine) From Springer

There currently is a clear tendency to an increasing number of accidental injuries in elderly people, in sport injuries and car crashes also in countries which recently joined the European Union and candidates to join the European Union. Patients expect very good functional results even after serious injuries. But in contrast to this development, Trauma Surgery as an independent field, is not yet established in all European countries. Therefore, it seems mandatory to compile a book that covers the state-of-the-art in Trauma Surgery. The book also serves to harmonise the practice of Trauma Surgery within the European Union, and to prepare for the exam of the U.E.M.S.

Editorial Review

Review

From the reviews:

“This is the second volume in the Trauma Surgery series produced by the editorial group of the European Manual of Medicine. It provides an overview of trauma care with a European perspective. Use of this work could facilitate preparation for standard European examinations. Providers and trainees at all levels of sophistication managing patients with injuries will find this work helpful. ... This book provides an overview of clinical organization, resuscitation, and management of common problems.” (David J. Dries, Doody’s Book Reviews, May, 2014)

From the Back Cover

All European countries, including those that have recently joined the European Union or are candidates for membership, currently show a clear trend towards an increasing number of accidental injuries. This holds true for a range of injuries, including accidents among the elderly, sports injuries, and trauma due to traffic accidents. The increase in the number of injuries is accompanied by rising expectations among patients, who anticipate good functional results even after serious injuries. Despite these developments, trauma surgery is not yet established as an independent field in all European countries. Against this background, there is a clear need for a book that covers the state of the art in trauma surgery. This volume, which focuses on basics in trauma surgery is intended to help to meet this need. It will also serve to harmonize the practice of trauma surgery within the European Union and to prepare for the UEMS EBSQ trauma surgery.

About the Author

Professor Hans-Joerg Oestern, Head of the Dept. for Trauma and Reconstructive Surgery, General Hospital Celle. Undergraduate studies in Bonn and Vienna. We should have General Trauma Care and Related Aspects: Trauma Surgery II (European Manual of Medicine).

Cedric Barnett:

As a student exactly feel bored to be able to reading. If their teacher questioned them to go to the library or even make summary for some guide, they are complained. Just small students that has reading's spirit or real their pastime. They just do what the trainer want, like asked to go to the library. They go to right now there but nothing reading very seriously. Any students feel that studying is not important, boring in addition to can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this period, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this General Trauma Care and Related Aspects: Trauma Surgery II (European Manual of Medicine) can make you truly feel more interested to read.
